Rule 1.131 Declaration of Andrew D. Hood

I, Andrew D. Hood, declare that all statements made herein of my own knowledge are true, and that all statements made on information and belief are believed to be true.

1. I am a joint inventor of the present application and have reviewed the application and all currently amended claims.
2. In late 2000 to early 2001, I worked with Jeffrey S. Sliwa to develop the above-captioned invention. Documentation of the development of the invention is recorded in Exhibit 5 and 6, and records of emails are attached hereto as Exhibit 4.
3. On January 11, 2001, I met with Daniel P. Maguire at his office at 423 E Street, Davis, California 95616. As of this meeting all claimed elements of the invention were completed and details fully commensurate with the scope of all currently amended claims were discussed.
4. On or about January 14, 2001 I sent to Maguire a written disclosure of the claimed invention. A true and correct copy of this agreement is attached hereto as Exhibit 1.
5. On or about January 26, 2001 I produced an early version of a marketing flyer to promote the claimed invention at trade show in Baltimore, Maryland. A true and correct copy of this document is attached hereto as Exhibit 2.
6. I am in possession of the original Executable computer files that are fully commensurate with the scope of all claims in question. These files are available on

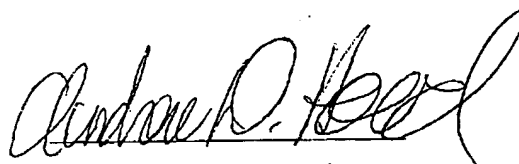

BEST AVAILABLE COPY

my computer at 14500 Surrey Place, Pine Grove, California 95665 and were created prior to February 23, 2001.

Exhibit	Document Description	Date
1	Invention Disclosure	January 14, 2001
2	Field Saver Trade Show Flyer	January 26, 2001
3	Spreadsheet showing emails sent regarding invention	December 28, 2000 – February 25, 2001
4	Documentation of Invention Development 1	October 23, 2000 – March 26, 2001
5	Documentation of Invention Development 2	October 23, 2000 – March 26, 2001

Executed this 4th day of January, 2007 at Pine Grove, California

I declare under penalty of perjury under the laws of the United States of America that the foregoing is true and correct. I understand that willful false statements and the like are punishable by fine or imprisonment or both, and may jeopardize the validity of the application or any patent issuing thereon.

Andrew D. Hood

**Draft for Patent Application of 'FieldSaver'**

January 14, 2001

EXHIBIT 1**1. PURPOSE OF PRODUCT**

- a. EMS electronic patient care record that can be created on handheld computers using the Windows CE operating system. Designed to have point of service handheld data entry. Data is used to develop a patient medical record, as well as maintain a database that can be used for research, billing and quality assurance.
- b. Sophisticated customizable/editable database that can produce proper sentences to develop a written report.

2. UNIQUE FEATURES

- a. **Customizable Database That Can Produce Proper Sentences:** Software is capable of having the end-user customize the lists in the database and also create/edit the heading 'labels', and the 'captions' that are associated with each list box. Formatting and grammatical options transform the database list choices, labels text, and captions text into intelligible sentences. You can create completely new screens and then assign navigation to the screen you just created. With the ability to create completely new screens and have the data reported as custom proper sentences, and then navigate to these screens, allows the end user to extensively customize and improve the data collection process and the report produced by it. Programming is in the Microsoft Windows CE operating system. This is the 'template manager' software. See diagram 1.
- b. **'Matrix' Template Design:** Specific design of matrix template. Allows a very flexible, powerful mechanism to pick a multitude of modifiers (physical signs, complaints of), for a multitude of objects (body parts). Similar to the other templates this template is end user editable. See diagram 2.
- c. **Flow' and Design of Product screens:** Design of screens and program layout specific for EMS documentation. To make the program user friendly extensive effort went into the categorization and presentation of screens, and database choices. Extensive research, trial and error, and expertise required to develop this system on a handheld computer.

BEST AVAILABLE COPY

Field*Saver

Advanced EMS Documentation

*Using technology that is finally powerful enough and extensive design by paramedics and EMS base physicians Circle H Software has produced Field*Saver. The first EMS electronic charting system that produces an excellent chart, that is fast, intuitive and customizable.*

SOPHISTICATED ELECTRONIC REPORTS

- Handheld computer with over 200 diseases and conditions
- Selects the most appropriate combination of screens for each condition and prompts for complete exams and accurate documentation
- Typed reports in an improved format
- Ensures protocols are followed, decreases medical and documentation errors and deficiencies

FAST ? EASY INTERFACE

- Bright color handheld computer fits in your pocket, easy to carry and use
- Intuitive screen layout and navigation makes it easy to use without extensive orientation.
- Program leads you through an exam
- Statistical information, address, times can be entered before patient contact saving time. Information can be done at the bedside, "documenting as you go" to save time and be more complete

CUSTOMIZABLE

- Your exam and documentation affect your care and reimbursement. Now you can improve these by customizing the screens to guide your personal through an exam, documenting ? as the go.
- Changing protocols, medical standards, medication changes, and reimbursement issues can be continually upgraded and improved without difficulty or cost.

				Letter to compaq computer rep advising of "We have designed and will be previewing on March 14th, an EMS (ambulance) electronic charting system on the windows CE platform, specifically using the ipaq 3650. Our system will require 2 handhelds on each ambulance that will connect through Ethernet to a hospital (destination) based PC. I am looking for contacts within your company to set up a business account and hopefully form strategic alliances. Any help or information you have would be gretly appreciated. Thank you very muchfor oyou time."
